

Schibsted Chat Interview Test

You will be provided with source code in Xcode or Android Studio.

We are looking for fixing the run/compile time errors to be fixed with best engineering approach.

Below is the wire frames you will be given .

Type your name

First Name & Last Name

LOGIN

already reserved for you “friends”. When you type in some text to current chat your chat bubble should appear like dark grey one as shown at the bottom.

Logout button on the top right : If user doesn't logout, App should show the chat screen directly without login page.

First View will include an given image and login details like left. You need to enter a name and this will be your name for the rest of the app.

Second view as below is titled with “Chat”
You will retrieve the chat.json from
“<https://s3-eu-west-1.amazonaws.com/rocket-interview/chat.json>”

This will include all previous chat on the second view. Please do choose any name expect “Carrie - Anthony - Eleanor - Rodney - Oliva - Merve or Lily ” These names are

Chat - [First Name & Last Name]

Have you ever heard the expression, “Do not count your chickens before they hatch?”

Carrie - 11:28

Or have you been trying to sell a product that has not been selling?

Anthony - 11:32

Always be focused on the big picture. Visualize yourself succeeding

Eleanor - 11:33

And the last principle is the affirmation of success must be repeated again and again in spite of failure. Within passage 42 and 43

Rodney - 11:35

To guarantee success, act as if it were impossible to fail

11:35

Type something
